EXPERIENCE

Cloud Intern
Ooredoo

📅 Juin 2022 – August 2022

- Developed different models for application discovery and dependency mapping using Wireshark to capture network packets in a CSV file and Neo4j for modelization.
- Created a virtual data center using vSphere, Windows Server and ESXi server.
- Setup a vSphere Distributed Switch to mirror virtual machines ports to the analyser virtual machine.

Software Engineer Intern
AngelCall

📅 Juin 2021 – August 2021

- Created a website for a call center that allows the company to post jobs offers and filter applications posted by the users using Symphony and MySQL.

PROJECTS

CI/CD Project
jenkins, sonarqube, git, nexus maven, juint, prometheus, grafana

📅 Sep 2022 – Oct 2022

- Built a CI/CD pipeline with Jenkins.

Cloud IAAS (Real Estate Website)
spring boot, angular, openstack, docker, ansible, kubernetes

📅 Jan 2022 – May 2022

- Developed and designed a Website for Real Estate eCommerce that allows agents to list houses for sell and customers to book a visit to the house.
- Deployed an Infrastructure-as-a-Service Using OpenStack.
- Deployed the Website on the infrastructure using Kubernetes.

Professional Networking (App/Website)
html, css, js, sql, symfony, java, javafx, codename one

📅 Mar 2021 – May 2021

- Developed and designed a Website for professional networking that allows job seekers to post their CVs and employers to post jobs.
- Created desktop application using Java for the database management.
- Used JavaFX to create a GUI that supports actions such as creating an account, Post Jobs, list all offers, etc
- Development and design of A Mobile Application using Java with Codename1 Gui .

EDUCATION

Pursuing bachelor degree in Computer Engineering

Ecole Supérieure Privée d'Ingénierie et de Technologies" university (ESPRIT)

📅 Sep. 2018 – Present

High School degree in Mathematics

Khir el din Becha High School

📅 2014 – 2018

ABOUT ME

I am a final year engineering student seeking an internship for the end of studies project in the field of computer science (DevOps/Cloud computing) where I can apply my knowledge and skills for continuous improvement.

SKILLS

- Cloud/DevOps: Kubernetes, Docker, Ansible, Openstack, Git, Jenkins, Sonar, Nexus, Azure
- Virtualization: Vsphere, Vmware, KVM
- DataBase Management: Orcale, MySQL, PL/SQL, Neo4j
- Operating System: Windows Server, Windows, Linux
- Programming Languages: Angular, Spring Boot, .NET, Symfony, HTML/CSS/JS, C/C++, Java

LANGUAGES

- English: Fluent
- French: Advanced
- Arabic: Native
